Committed to Sustainable Design

There are 3 key goals driving Wilsonart® sustainability initiatives :

Zero Waste | Zero Impact | Zero Barriers

Zero Waste has focused Wilsonart® on eliminating unnecessary materials, processes and waste from the product we make and sell.

Zero impact policies has brought about greater focus on recycling to help our environment. Improving the quality of indoor air is vital for human health and Wilsonart® Laminate exceeds the industry's highest standards for Indoor Air Quality with SCS indoor advantage and Greenguard. The Greenguard certification ensures that a product has met some of the world's most rigorous and comprehensive standards for low emission of volatile organic compounds (VOCs) into indoor air. This standard includes health based criteria for additional chemicals and also requires lower total VOC emission levels to ensure that product are acceptable for use in more sensitive environments such as schools and healthcare facilities.

Zero Barriers focuses on the things Wilsonart® people can do in the local environment. This includes community programmes and practical measures such as providing end-of-line color sample chips to children and art students for their projects, reducing cost for schools while adding to our recycling commitment.

Sustainability is a full-circle program at Wilsonart®
